EXPERIENCE

Golf Business Network (Argus Intelligence LLC), Charlottesville, VA — April 2025 – present

Head of Digital Development. Joined as Software Development Intern; sole engineer for the platform.

- Own the member platform end to end: a suite of custom WordPress plugins (careers hub, events, member directory, club data API, charting that replaced Tableau, mobile API), a hosted MCP platform, an iOS/Android app, and the monitoring that watches all of it.
- Replaced WP Job Manager and five paid add-ons with an in-house careers hub (PHP, 9 tables, 226-assertion headless self-test); migrated 229 postings with zero broken inbound links and no accidental CRM emails; added Claude-based résumé parsing.
- Designed a Python MCP platform (FastMCP, Starlette) hosting 9 servers and 112 tools against the CMS, CRM, database, events and wiki: OAuth 2.1 bridge to WordPress Application Passwords so no credential is typed or stored, per-tool read/write permissions, every call audit-logged.
- Shipped a native iOS/Android app (Expo, React Native, TypeScript) over a 49-path OpenAPI contract with generated client types, a 92-check API suite and APNs push sent directly from PHP; handled App Store review requirements in-app.
- Built the monitoring service (FastAPI, 21 collectors, 109 checks, HMAC-signed runbooks): a snapshot-and-diff change ledger and an alert path that never depends on the site being monitored.
- Diagnosed two broadcast-day outages and fixed the root cause with a request-scoping mu-plugin: per-request load fell from 109 plugins / 389 MB to 21 / 14 MB. Cut the CRM flow editor's render time from 5.4 s to 0.26 s with byte-identical output.

Dynetics, Inc. Threat Exploitation and Spectrum Warfare Division — May 2020 – August 2023

Software Development Intern (summers)

- Modeled radar configurations and a monopole field in C++ and MATLAB on a 10-person Agile team; structured documentation with Perl and Doxygen; evaluated and tested custom software for government applications.

Virginia Tech Engineering IT Blacksburg, VA — August 2021 – January 2022

IT Technician (Windows, macOS, Linux)

- Diagnosed hardware and OS-level problems for engineering students; built Windows deployment images; maintained VMs and a networked lab running SolidWorks, MATLAB and AutoCAD.

Farmington Country Club Charlottesville, VA — August 2023 – January 2024

Outside Services Manager

- Ran daily outside operations for an award-winning course and mentored a high-school staff. Useful context for building software club staff actually use.

SELECTED PROJECTS

Earshot `github.com/connorprp/earshot`

Ambient conversation dashboard: a native capture agent (Python, local Whisper on GPU) streams transcripts to a Node hub where the Claude Agent SDK distills live concept bubbles with suggested actions. Multi-tenant, Windows and Mac installers, self-updating agents.

Bird Targets `github.com/connorprp/bird-targets`

"Which life birds are being seen near me right now?" eBird API, Vue 3, Express, Docker on a self-hosted Coolify server.

Eagle Analytics `Bridgewater College`

Led a small MEVN team building a sports-statistics dashboard: managed tasks and PRs, built Vue components, Express APIs and indexed MongoDB queries.

SKILLS

Languages	TypeScript / JavaScript, PHP, Python, SQL, Java, C++
Web	WordPress internals and plugin architecture, Vue 3, React Native / Expo, Node / Express, OpenAPI
Services and data	FastAPI, FastMCP (Model Context Protocol), MySQL, SQLite, MongoDB, OAuth 2.1, HMAC-signed APIs
Infrastructure	Docker, Coolify, Render, Cloudflare, Cloudways, Tailscale, GitHub Actions, Linux administration
AI tooling	Claude Agent SDK and Messages API, MCP server design, Claude Code workflows, Whisper

EDUCATION

Bridgewater College, Bridgewater, VA. Computer Science

Virginia Tech, Blacksburg, VA. Computer Engineering coursework
